**Inc. Magazine Reveals Its 25th Annual List of America's 500
Fastest-Growing Private Companies**

***Health-Care IT Consultants, H2H Solutions, Ranks No. 113 on the 2006 Inc. 500,
No.1 in Michigan***

New York, August 24, 2006 – *Inc.* magazine today announced its 25th Annual Inc. 500 ranking of the fastest-growing private companies in the country. Health-care Information Technology company, H2H Solutions, ranks No. 113 on the list and No.1 in Michigan.

Founded by Rupesh Srivastava in July 2000, H2H prides itself on filling the need for digital healthcare management and electronic data interchange among various healthcare entities including providers (physicians, hospitals, labs, pharmacies etc.), payers (health insurance carriers, HMOs, PPOs, POSs, Medicare, Medicaid etc) and sponsors (employers).

“We are very pleased to receive this award,” said Srivastava. “It encourages us to continue to develop better products and services for the ever growing health-care sector”.

Recently designated as a “Future 50 of Greater Detroit” by the Detroit Regional Chamber of Commerce, H2H continues to offer practical solutions to physicians, patients and pharmacists with products like Digital Rx™, a comprehensive web-based e-Prescribing platform. Certified by RxHub, Digital Rx™ provides patient eligibility, benefit, formulary, and medication history information to physicians at the point of care, and then electronically forwards the physician’s prescription choice to the preferred pharmacy for each patient.

“There are certain areas within the healthcare system in the United States that lend themselves to collaborative rather than competitive efforts, “ says Milan Popovich, Chief Marketing Officer. “All health care payers have a vested interest in seeing physicians adopt e-Prescribing technology, and H2H is aggressively working toward that goal”.

Digital Rx™ is one example of the diverse health care product line created by H2H. The company also provides IT resources, testing, and development expertise to health care payers across the country, and prides itself on employing processes that are consistent with its’ SEI CMMI Level 3 certification.

The 2006 Inc. 500 list measures revenue growth from 2002 through 2005. To qualify, companies had to be U.S.-based, privately held independent – not subsidiaries or divisions of other companies – as of December 31, 2005, and have, and have at least \$600,000 in net sales in the base year.
